## Implement Stack using Linked List in C.

```
1  // implementation of stack using linked list
2
3  #include<stdio.h>
4  #include<stdlib.h>
5
6  struct stack
7  {
8      int data;
9      struct stack * bottom;
10 };
11
12 struct stack * createNode(){
13     return (struct stack *)malloc(sizeof(struct stack));
14 }
15
16 int isEmpty(struct stack * top){
17     if (top == NULL){
18         return 1;
19     }else{
20         return 0;
21     }
22 }
23
24 int isFull(struct stack * top){
25     struct stack * ptr = createNode();
26     if (!ptr){
27         return 1;
28     }else{
29         return 0;
30     }
31 }
32
33 struct stack * push(struct stack * top, int data){
34     if (isFull(top)){
35         printf("Stack Overflowed !");
36     }else{
37         struct stack * ptr = createNode();
38         ptr->data = data;
39         ptr->bottom = top;
40         top = ptr;
41         return top;
42     }
43 }
44
45 void pop(struct stack ** top){
46     if (isEmpty(*top)){
47         printf("Stack is empty !");
48     }
49     else{
50         struct stack * ptr = *top;
51         *top = (*top)->bottom;
52         int data = ptr->data;
53         free(ptr);
54         printf("Popped element is: %d\n \n", data);
55     }
56 }
```

```
1 void traverseStack(struct stack * ptr){
2     if(ptr != NULL){
3         printf("Ele: %d \n", ptr->data);
4         traverseStack(ptr->bottom);
5     }
6 }
7
8
9 int main(){
10
11     struct stack * top = NULL;
12
13     printf("Initial stack is:\n");
14     traverseStack(top);
15
16     printf("\n\n");
17
18     printf("Pushing elements in stack:\n");
19     top = push(top, 5);
20     top = push(top, 10);
21     top = push(top, 67);
22     top = push(top, 12);
23     top = push(top, 1);
24     traverseStack(top);
25
26     printf("\n\n");
27
28
29     printf("Popping elements from stack:\n");
30     pop(&top);
31     traverseStack(top);
32     printf("\n\n");
33     pop(&top);
34     traverseStack(top);
35     return 0;
36 }
```

**OUTPUT:**

```
Initial stack is:
```

```
Pushing elements in stack:
```

```
Ele: 1
```

```
Ele: 12
```

```
Ele: 67
```

```
Ele: 10
```

```
Ele: 5
```

```
Popping elements from stack:
```

```
Popped element is: 1
```

```
Ele: 12
```

```
Ele: 67
```

```
Ele: 10
```

```
Ele: 5
```

```
Popped element is: 12
```

```
Ele: 67
```

```
Ele: 10
```

```
Ele: 5
```

```
